# ARMOUR'S BIG CROP FERTILIZERS

## FERTILIZERS ARE PLANT FOOD CARRIERS

Nitrogen, referred to as Ammonia, is directly associated with the formation of leaves and stems in plants, promoting a quick and vigorous growth which is accomplished by a deep, rich green color of foliage—a sign of health and activity.

Phosphorus, known as Acid Phosphate or Phosphoric Acid, hastens germination and favors rapid development of young seedlings, increasing the root growth, thus giving the young plant a good start. The formation of grain and fruit begins sooner when applications of soluble phosphorus are freely made. Phosphorus fills out the grain and fruit, increasing the proportion of grain to straw.

Potassium, commonly called potash, has a marked influence upon the development of leaves and stems. When potash is lacking, stems are apt to be weak and brittle. Potash enables the plant to produce sugar and starch, and helps to plump and fill the grain. It is also necessary in developing the fleshy parts of fruit.

Wholesale  
List for

1934

**All Previous Price Lists Are Hereby Cancelled**

**PRICES SUBJECT TO CHANGE WITHOUT NOTICE**

**W**E HAVE again the pleasure of presenting to you our catalogue for the coming season, and hope you will be induced by the extremely low prices to favor us with your orders which shall have our careful and prompt attention.

All our seeds have been selected with the utmost care and attention therefore we are sure of their superior quality. No complaint can be entertained unless made on receipt of the goods and invoice, and no warranty or guaranty is given either as to description, quality, productiveness or any other matter of any seeds we send you, nor will we be responsible for the quality or value of the crops produced therefrom. Nevertheless we will certainly pay attention to any founded complaint, but a restitution of any article can never exceed the amount charged for in the invoice.

Being able and ready to meet all respectable competition, we would be glad to be informed if you are offered any article lower than these prices, and in such cases, we will, if possible, give you other quotations.

**ALL ACCOUNTS ARE DUE AND PAYABLE ON JUNE 1ST unless otherwise agreed upon.**

References as to quality of seeds sold by us; any of the leading market gardeners in the vicinity.

Respectfully,

O. MACHHOLZ SEED CO.

# NOVELTIES

1934

---

### **“MORSE’S BUNCHING CARROT”**

This variety is ideal for bunching, being a half-long carrot, and cylindrical. Color is deep orange, with small cores, and short tops. A Carrot of fine quality, being very sweet.

### **“ASGROW WONDER BEET”**

This semi-flat Beet with rounded bottom is large, and has a deep red color. It has an exceptionally dark interior, fine flavor, medium top and good tap root.

### **“GLOWING GLOBE RADISH”**

A new variety, short topped, small tap roots, very smooth and has a very attractive color. It can be used for either Greenhouse or Outdoor planting.

### **“CRISPY GLOBE RADISH”**

A new distinct type of Radish for Greenhouse forcing. Will neither crack or get pitty.

### **“MILWAUKEE PEA”**

The pods of this new variety are single and double, round, very dark green, and contain from 8 to 10 peas of good quality.

### **FLOWER SEED NOVELTIES FOR THIS SEASON**

Calendula, “Chrysanthia”

Salvia, Splendens, “Primus”

Pansy, Roggli, “Luna”

Aster, “Surprise, Charm”

Bellis Perennis, “Crispa,” Cherry  
and White

Aster, “Surprise, Salmon Gold”

Scabiosa, “Large flowering Giants”
